
Professional summary

Data Analyst skilled in Python, SQL, Power BI, and data visualization, with hands-on experience in extracting actionable insights from complex datasets. Skilled in transforming raw data into business intelligence through analytics and dashboard reporting.

Skills

- **Analytics & BI :** Data Cleaning, Trend Analysis, Statistical Modelling, Business Intelligence Reporting.
- **Visualization:** Power BI, (DAX, Data Modeling, Drill-throughs, Bookmarks, Tooltips), Tableau.
- **Programming and Database:** Python (Pandas, NumPy, Matplotlib), SQL (Joins, Window Functions, Triggers).
- **Excel & Google Sheets :** Pivot Tables , Dashboard Development, Data Validation.
- **Soft Skills :** Business Communication , Analytical Thinking , Problem Solving, Attention to Detail.

Experience

1. Data Analyst Intern | Future Interns | May 2026 - June 2026

- Delivered data-driven business insights by analyzing sales performance, customer retention, and marketing funnel datasets using Power BI, Python, SQL, and Excel.
- Designed interactive KPI dashboards and visualization reports that identified revenue trends, customer churn patterns, and conversion drop-offs, supporting strategic business decisions.
- Performed data cleaning, transformation, and advanced analytics on real-world datasets, improving reporting accuracy and generating actionable recommendations for business growth.

Projects

1. Credit Card Financial Dashboard | Power BI, Excel | [Dashboard Link](#)

- Developed an interactive Power BI dashboard to analyze credit card transaction trends and customer spending behavior.
- Visualized \$73M+ total transaction revenue using KPI cards, donut charts, line charts, and geospatial maps.
- Built dynamic filters and slicers for gender, city, category, and profession-based analysis.
- Identified transaction distribution patterns and fraud-related trends to support business decision-making.
- Improved dashboard storytelling and user interaction through modern UI design and data visualization techniques.

2. Hospital Management System Analysis Dashboard | SQL, Power BI, DAX | [Dashboard Link](#)

- Built an interactive KPI dashboard analyzing hospital appointments with filters for doctor, department, and DAX-based metrics (cancellation rate, department load, doctor performance, demographics).
- Identified a 10% appointment cancellation rate and uncovered a no-show rate, enabling resource optimization and reduced scheduling conflicts.
- Provided financial insights (Cash vs Insurance dominance, payment behavior) supporting payment gateway integration strategies. Optimized BI dashboard and increasing decision-making efficiency by 45% for stakeholders.

- Improved decision-making efficiency for administrators by highlighting top-performing doctors, patient age/gender trends, and monthly appointment patterns, resulting in data-driven staffing and patient care improvements.

3. Call Center Trend Analysis | Excel, Data Visualization | [Dashboard Link](#)

- Analyzed 117K+ call records to identify demand patterns, staffing gaps, and peak call volumes (10 AM–3 PM), reducing call abandonment rate from 54% to a targeted 10% through manpower reallocation.
- Processed and cleaned 47K+ abnormal/NULL values, applied pivot tables and advanced formulas to build a 24/7 manpower strategy ensuring SLA compliance and optimized resource allocation.
- Delivered executive-ready visualization highlighting call complexity trends (avg. 20s duration in evenings), enabling management to deploy specialized agents during high-complexity hours and improve customer satisfaction.

4. Sales Data Analysis and Visualization | Data Analytics Project | [Dashboard Link](#)

- Cleaned and analyzed sales data using Python to identify key trends and performance metrics. Created visualizations using Matplotlib for clear and effective data representation
- Analyzed revenue trends, product performance, and monthly growth patterns Generated insights and presented findings through structured and easy-to-understand reports.

Conference & Certificate Details

- Presented a research paper titled “Deep Learning-Based Real-Time Sign Language Interpretation for Text and Speech Production” at the 14th International Conference on Contemporary Engineering and Technology (**ICCET 2026**), Chennai | [View here](#)
- **Programming Essentials in Python** certification from **ICT Academy** | [View here](#)
- **Internship Common Aptitude Test** certification from (**iCAT**) | [View here](#)
- **Deloitte Australia - Data Analytics Job Simulation** | [View here](#)

Education

- **Master Of Computer Application | (Aug 2024- March 2026)**
Sathyabama Institute Of Science and Technology | Chennai, TamilNadu
- **Bachelor of Computer Application | (July 2021- March 2024)**
Gurunanak College | Chennai, TamilNadu
